

CRAFT IN AMERICA

REPRESENTING COMMUNITY EDUCATION GUIDE

Name:

Worksheet 2: Playing with Patterns

"I'm inspired by the ancient Greek pottery and those potters were working in the same exact way that I'm working today except they did it several thousand years ago. Just to be a part of that lineage for me is really exciting" —Roberto Lugo

Part 1: In this section, make a small sketch of you. Surround your mini self-portrait with depictions of things you like and that are important to you, including the art you like to make and enjoy.

In the space below, sketch an imaginary map that shows all the communities you are part of, such as family, neighborhood, school, work, place of worship, and organizations. Think of communities of interest as well, like art, music, sports, books, games, movies, and clubs.
